AdditionalComments:	We vacation at Roaring River State Park every year and have for 40 years. We love playing in the river, the part that is designated as a multi purpose section where wading, fishing and swimming are all allowed. We pick up trash in and along the river. We have learned about fish, crawdads, insects and animals over the years. Many people relax, cool off and enjoy this stretch of the river.

This watershed is greatly affected by everything that happens north of the stream. Large industrial chicken processing is good for our economy but needs to pay for any protections their discharge creates. It should be in the price of the end product and all who buy it will help protect our water. Resource Management is a citizen health issue. These
